PROJECTS

SecScan – GitHub Security Auditing Platform

Live Demo: secure-scan-beta.vercel.app | GitHub: github.com/mr-aniket-2004/SecureScan

Technologies: React, Tailwind CSS, Python, FastAPI, Supabase, PostgreSQL, Gemini AI, GitHub Actions

- Built a responsive React dashboard with reusable components and Tailwind CSS to display repository security audits.
- Developed FastAPI REST endpoints and Supabase/PostgreSQL data models to store and serve scan results.
- Integrated Google Gemini AI to analyze vulnerabilities and generate contextual remediation suggestions.
- Configured GitHub Actions for automated testing and CI/CD pipelines.
- Used AI-assisted coding tools to speed up feature delivery, code review and debugging.

Gurukul – E-Learning Web Platform

GitHub: github.com/mr-aniket-2004/Sem_5_project

Technologies: Python, Django REST Framework, SQL, JavaScript, Bootstrap, HTML5, CSS3, Razorpay API

- Built server-side REST APIs with Django REST Framework, including authentication and role-based access control for multiple user roles.
- Created UI screens from wireframes using JavaScript and Bootstrap and connected them to backend authentication endpoints.
- Integrated the Razorpay payment gateway for checkout and transaction processing.
